History: Reviews of New Books

A journal that every college library should have, *History: Reviews of New Books* lets readers know what's new in current scholarship on historical topics. Approximately 100 book reviews per quarterly issue cover all geographic areas and time periods, from ancient times to the present. The reviews are concise, authoritative (written by professional historians and scholars), and timely (with few exceptions, all books reviewed have been published in the last year). They outline and evaluate the author's arguments, describe the sources used in the research, and place the book in the context of other scholarship. *History* is invaluable for professors planning course syllabi, for graduate students trying to keep current with cutting-edge work, for libraries making regular acquisitions, and for all professional and amateur historians.
